LTCI HAS ARRIVED
TREATMENT AID FOR
FeLV / FIV INFECTIONS

FeLV / FIV Treatment Aid

Lymphocyte T-Cell Immunomodulator (LTCl) is the **first and only approved treatment aid in the United States** for Feline Leukemia Virus (FeLV) and Feline Immunodeficiency Virus (FIV) infections.

Results from clinical studies have shown LTCl to have positive benefits on the health of cats infected with FeLV and FIV.

Ask your veterinarian about LTCl.

Frequently Asked Questions

What is FeLV and FIV?

FeLV/FIV infections are two of the most common feline diseases worldwide. Infections can cause severe immune suppression, anemia, and result in increased risk of other infections. LTCl is the first and only approved treatment aid* in the United States for cats suffering from FeLV and FIV infections.

How does LTCl work?

LTCl is a naturally occurring immune stimulating protein that helps restore your cat's ability to fight infection by increasing the production of lymphocytes.

What are lymphocytes?

Lymphocytes are immune cells that help the body identify and destroy viruses and certain cancers.

*Conditional licenses are granted by the USDA's Center for Veterinary Biologics to products that have met reasonable expectation of efficacy, have demonstrated purity, and passed safety testing.

How is LTCl administered?

LTCl is injected under the skin. For the first month LTCl is given weekly, then it can usually be given monthly, or as needed, depending on the cat's response and your veterinarian's advice.

When should my sick cat feel better?

Clinical studies show that some cats respond in the first few weeks. Response to treatment may vary depending on your cat's condition and their immune status.

How safe is LTCl?

LTCl has passed a formal safety study where no significant adverse events were reported.

Is LTCl natural?

Yes, LTCl is a naturally occurring treatment aid and is not synthetically made.

Where can I get LTCl?

LTCl is only available through licensed veterinarians in the United States. Please contact your veterinarian to discuss LTCl treatment options.

If your veterinarian would like to find out more information on LTCl, have them contact **ProLabs Ltd. at 1-800-367-6359** or visit **www.prolabsanimalhealth.com**.
